

Welcome to the Future of Welding

Introducing the Miller OptX™ 2kW Handheld Laser Welder

This is where productivity meets precision to change the welding game and supercharge your workforce.

Say goodbye to traditional limitations and hello to seamless welds and major efficiencies in your workflow, all thanks to handheld laser welding technology. It's time to step into the future of welding to unlock your shop's productivity:

Even novices weld like experts

With almost no learning curve, expand your workforce's capabilities like never before.

Up to 5-10x productivity increase

With faster travel speeds, more work gets done more efficiently.

3-year warranty

Backed by our national service network, of course.

Limited pre/post-weld processing

Preparation and grinding are almost a thing of the past.

MILLER + IPG Unbeatable combination

Miller's welding expertise partnered with IPG's laser knowledge provides double the benefits.
