

# Work Truck Solutions Training

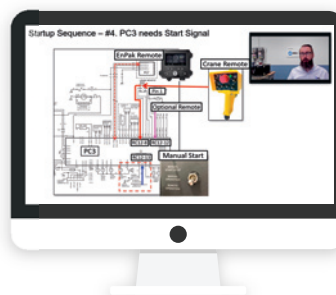

Equipment is only as reliable as the people who service it. Our service training equips technicians with the knowledge and confidence to install, operate, and maintain equipment correctly — reducing costly downtime and protecting your investment.

## What to expect —

This structured training program is designed to build skills progressively, combining flexible online learning with advanced hands-on or virtual instruction. Technicians gain practical real-world knowledge they can use in the field.

On-Demand  
(e-Learning)

Virtual Instructor-Led  
Training (vILT)

In-Person Learning

# Training Levels and Time Commitment

## Level 1 EnPak® — Operation and Installation

Build a strong foundation in proper setup and safe operation

- 7 self-paced online classes
- Approximately 90 minutes total
- Accessible anytime through the online Partner Portal

## Level 2 EnPak® — Service Fundamentals

Develop core troubleshooting and maintenance skills

- 6 self-paced online classes
- Approximately 2.25 hours total
- Completed through the online Partner Portal

## Level 3 EnPak® — Service Course

Take expertise to the next level with in-depth service training

- Prerequisite: Completion of Levels 1 and 2
- Choose your format:
  - In-person: 3-day training at our Appleton, Wisconsin facility
  - Virtual: 4 half-day sessions

### Increase uptime

Well-trained technicians diagnose and resolve issues faster — keeping equipment running and jobs on schedule.

### Reduce risk

Proper installation and service practices help prevent failures, safety incidents, and costly rework.

### Boost profitability

Less downtime, fewer service errors, and improved efficiency translate directly to stronger margins and better ROI.
