

Single Stage Pressure Regulators (Series 30 and 40)

Accurate and reliable

Series 30

Series 40

Resin Bonnet Insert

Allows smooth, easy adjustment even at high-pressure levels

Stainless Steel Diaphragm

Resists corrosion, leaking and freeze-up if used with liquid (cryogenic) gases for extended service life

*Series 30 has neoprene composite diaphragm

Color-coded Labels

Supply performance capabilities, easy gas service identification and technical information

External Relief Valve

Protects regulator from damage due to inadvertent high-pressure surge, and relief valve will release excessive pressure and automatically reset

Sure Seat[™]

Corrosion Protection

Nickel-plated bonnet with forged brass body

Easy-to-Read Gauges

Shatter-resistant polycarbonate lens covers

*Series 30 has 2.0 inch gauges.
Series 40 has 2.5 inch gauges.

Dual Filters including Sure Seat[™]

Protects high-pressure seat from debris for reliable operation and long service life
