

RAISE YOUR STANDARD

NEW

HDI™ AIR PAK™ SERIES

The new HDI Air Pak series is a powerful, hydraulically driven, all-in-one power system that saves weight and space, allowing you to configure your truck for maximum efficiency.

NEW HYDRAULICALLY DRIVEN ALL-IN-ONE POWER SYSTEMS

SMALLER AND LIGHTER

Up to 400 pounds lighter and 54 percent smaller footprint over an engine-driven welder and standalone compressor.

INDUSTRY-LEADING WELD QUALITY

Best-in-class welding performance, reliability and support.

AUTO-SET™ TECHNOLOGY

Predefined weld settings make welding straightforward and accurate for technicians of all skill levels.

SIMPLE SETUP

Save time with a single, easy-to-use interface for air compressor, battery charge/crank assist and weld parameter settings.

MODULAR REMOTE PANELS

Individual panels allow for customized setup for quick, easy access and reduce the risk of injuries from climbing onto the truck.

QUIETER OPERATION

Reduced sound levels lessen noise fatigue on the jobsite.

FEATURING TWO MODELS:
HDI™ 265
& 325 AIR
PAK™

POWERFUL CAPABILITIES

COMPRESSED AIR

Rotary-screw compressor with 40 cfm (265 model) or 60 cfm (325 model) provides air on demand.

BATTERY CHARGE / CRANK ASSIST

Up to 150 amps of DC power for 12/24V battery charging. Up to 300 amps for crank assist.

AUXILIARY POWER

7,000-watt generator can handle most jobsite electrical needs to power electric tools, lights and more.

INTEGRATED MULTIPROCESS WELDING

Provides 265 amps (265 model) or 325 amps (325 model) of output.
