Issued March 2025 • Index No. AY/14.5

ArcReach® Stick/TIG Remote

ArcReach Controls

Quick Specs

Industrial Applications
Construction
Shipbuilding
Fabrication
Maintenance and repair

Processes
Stick (SMAW)
TIG (GTAW)
Air carbon arc gouging (CAC-A)

Communication Via existing weld cable to ArcReach power sources

Operating Voltage 14–90 VDC

Net Weight 5.8 lb. (2.6 kg)

Remote control of the power source without a cord.

Portable and lightweight, the ArcReach Stick/TIG Remote paired with an ArcReach power source allows you to change weld settings at your work area, saving a trip to the power supply.
No extra control cable to purchase, maintain, string or unstring — saving time and money.

PRODUCTIVITY QUALITY SAFETY

ArcReach®— remote control without a cord

QA BETTER WELDS WITH LESS REWORK

Improved weld quality

DURABLE BUILT TO LAST

Built to last in harsh industrial environments

MORE WELDS IN LESS TIME

Change weld settings in work area

TRUE BLUE® 1 YR. WARRANTY

Warrantied for one year, parts and labor.

Features

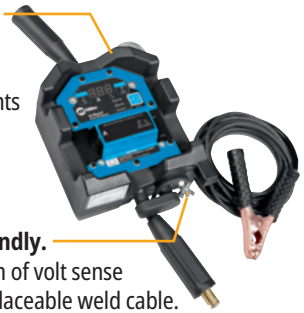
Remote override of power source. When the ArcReach Remote is connected, it has full control and the power source controls are disabled preventing accidental changes by personnel other than the welding operator.

More arc-on time and reduced exposure to workplace hazards for operators because less time is spent going back to the welding power supply to set process and weld settings.

Easy to adjust amperage (heat) control and arc control to fine tune arc characteristics.

Remove guesswork when it comes to adhering to weld procedures. Operators can precisely set amperage, the best weld setting (EXX18 or EXX10), view polarity and preset amperage.

Impact-resistant case provides durability, and protects components from moisture, dust and other contaminants.



Maintenance friendly. Toolless connection of volt sense lead and easily replaceable weld cable.

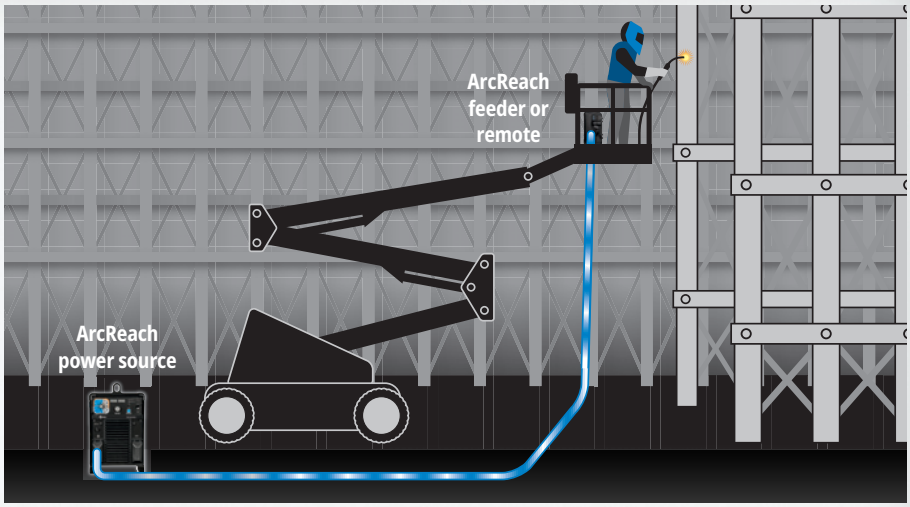
Auto-Process Select™. System automatically changes to Stick mode if electrode positive polarity is detected or TIG mode if electrode negative polarity is detected, reducing the need to access the power supply.

How ArcReach Works

ArcReach®

Remote control of the power source without a cord.

ArcReach technology uses the existing weld cable to communicate welding control information between the feeder or remote and power source. This technology eliminates the need for control cords, and their associated problems and costs.



Ordering Information

Equipment and Options	Stock No.	Description	Qty.	Price
ArcReach® Stick/TIG Remote	**301325**	Point-of-use control for stick or TIG and gouging with ArcReach power sources
